- \* In principle, use contest papers certified by Japan Origami Airplane Association.
2. Make Origami airplane by folding only. Do not cut, nor add weight. No sandpapering.
3. Categories of contest / Use of tape
- \* Flying time contest / Flying distance contest : Do not use tapes.  
Launching by hand (no launching tools).
- \* Flying time contest outdoor Catapult A4 / Design contest (A4)  
: Tape can be used for small parts only. : No gluing  
(Tape can be used up to 4 parts, each tape must be shorter than 2cm/per part)

## Record Rules of Contest

### To Far Away

#### 1. Distance contest (see Fig. 1)

- Indoor launch only. Width of the arena is free.  
Measure the distance from the launched place.  
Launch from & to the flat ground.
- After Origami airplane is landed sliding,  
measure where the airplane is landed at the same ground level as it is launched.  
Measure to the point of the airplane.
- Width of Origami airplane must be wider than 8cm.
- If Origami airplane hits wall or something,  
measure to the landing spot.
- Measure down to centimeter.  
(Measurements to be rounded to nearest centimeter.)
- If there are same distance records,  
ranking will be placed with total distance of 2 trials.

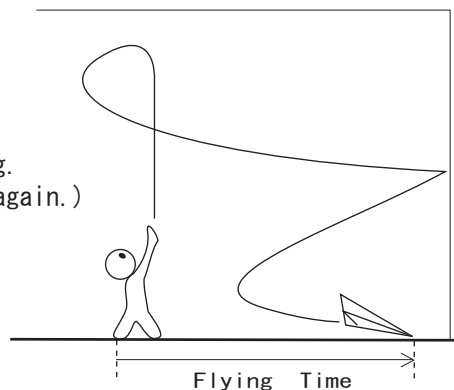

(Fig...1)

### Keep Flying For Longer

#### 2. Time contest (see Fig. 2)

- Compete with time from the moment of launch to landing
- Origami airplane must be launched and landed on flat ground.  
(Do not launch from high to low place.)
- If Origami airplane hits wall or something, use time to landing.  
(If Origami airplane is caught and stuck at high place, try it again.)
- Record time up to two places of decimals  
(E.g. : 1st trial 15.35seconds, 2nd trial 6.72seconds)
- Fill the column of venue, indoor or outdoor.

(Fig...2)
